

WHY US?

Who We Are

Core5 Group is a Nevada-based energy and infrastructure solutions provider specializing in end-to-end delivery across engineering, procurement, construction, project management, consulting, and operations & maintenance (O&M). We build resilient systems for commercial facilities and utility-scale projects, backed by decades of leadership in the electrical industry.

Why Core5

- Values-driven execution with measurable outcomes.
- Premium warranties and performance guarantees (parts & labor, initial spare parts coverage).
- Single point of accountability with disciplined project controls.
- Safety-first culture and compliance with codes and standards.

Vision & Values

Our vision is to lead the energy and infrastructure sector through integrity, innovation, excellence, accountability, and partnership—empowering clients at every stage.

- Integrity — transparent, ethical leadership and trusted execution.
- Innovation — forward-thinking solutions leveraging emerging technologies.
- Excellence — precision, quality, and performance across every project.
- Accountability — ownership of outcomes, timelines, and client trust.
- Partnership — lasting relationships built on collaboration and shared success.

OUR STORY

Core5 Group delivers full-cycle energy and infrastructure services — from design and procurement to construction and long-term O&M. With over 30 years of experience, we merge engineering precision with ethical leadership. Our mission is to build systems that empower communities, strengthen industries, and drive sustainable growth across every project.

In addition, we have led major commercial electrical projects for high-profile facilities including casinos, hospitals, schools, and retail developments. Our expertise in managing complex electrical systems for these environments ensured compliance with stringent safety standards while delivering operational excellence. These projects underscore our ability to execute large-scale initiatives that support critical infrastructure and community growth. Our expertise include project management, risk mitigation, stakeholder engagement, and ESG-aligned reporting frameworks.

Market Focus

- Utilities and microgrids, Solar, BESS, Generators, Inverters
- Electrical installation on Commercial and institutional facilities: schools, retail, hospitals, casinos, and large campuses

WHAT WE DO:

1. **Project Management** - Schedule, budget, risk, and stakeholder management with real-time reporting.
2. **Consulting** - Strategic planning, technical advisory, and owner's engineer services.
3. **Engineering** - Concept design, feasibility studies, permitting coordination, and detailed electrical design.
4. **Procurement** - Specification, sourcing, and quality assurance for certified, high-performance equipment.
5. **Construction** - Construction management, safety and compliance oversight, and field execution.
6. **Operation & Maintenance & Service** - Preventive maintenance, performance monitoring, troubleshooting, and upgrades.
7. **Commissioning** – Commissioning plan, ITPs, and checklists by subsystem, pre-functional and functional testing, FAT/SAT coordination, controls and communications, Performance testing and punchlist closure
8. **Training** – Operator and technician curricula with hands on training, safety procedures
